

STUDIES ON ETHNO-BOTANICAL USES OF THE MEDICINAL PLANTS OF UTTARAKHAND

Deepshikha Arya¹, G.C. Joshi² and Nidhi Lohani³

Abstract

The present study deals with indigenous uses of medicinal plants of Uttarakhand region. A total 90 species, belonging to 52 families, 84 genera and 90 species have been reported. These species have been analyzed for diversity, distribution, nativity and indigenous uses. The root, rhizomes, tubers, bulbs, leaves, bark, fruit, aerial parts and stem are used for the treatment of various ailments.
