

## Physico-Chemical and Chromatographic Study of Yavanyarka

P.L. Dhyani\* and A J. Baxi\*\*

Received on May 26th, 1981

*Yavanyarka has been prepared as per the standard ayurvedic formulary and its physico-chemical characteristics have been established. Thymol alongwith pinene, p-cymene, dipentene, and terpinene have been identified chromatographically. The values and the chromatographic findings could be useful as standards for control of quality and identification of Yavanyarka.*
