

## Use of Arboreal Medicinal Plants in Afforestation Programmes from Pune and Neighbouring Districts, Maharashtra State

V.S. Ghate<sup>1</sup> and V.D. Vartak<sup>2</sup>

*Plantation Programme is very important to make use of multipurpose arboreal plants. It will solve the problems in every day life of natural communities and also will help in preservation of rich natural flora for the future. The extinguishing forest treasure will affect socio-economic life of people. The man made forests have to be created as a substitute to meet the basic needs of masses. It will solve the problems like acclimatization and regeneration.*
