

## Scientific Approach and Methodology for Domestication and Commercial Cultivation of Medicinal Plants

P. Pushpangadan<sup>1</sup> and S. Rajsekharan<sup>2</sup>

*The systematic scientific cultivation of medicinal plants in India is relatively very recent. Most of the requirements for these plants were met through wild sources. The organised scientific cultivation can easily cope up with bulk production of Ayurvedic drugs on commercial scale. The plant scientists have to take up various challenges and evolve methodologies for cultivation of these Plant.*
