

Role of Medicinal Plants in Social Forestry/ Afforestation in Rajasthan

K.V. Billore¹, Ratan Mishra² and Bishnupriya Dhar³

The afforestation and social forestry programmes have gained much importance in the recent past, all over the country. In the state of Rajasthan this programme is being taken up actively. In the present paper an attempt has been made to put forth the importance of the medicinal plants in the afforestation and social forestry programmes of the state with the introduction of more of indigenous species.
