

Chemical Investigation of the Flowers of *Vitex pubescens* Vahl

N. Ramiah¹ and G. Aravindakshan Nair²

Received on 1st Jan., 1988

All the three flavones have been isolated for the first time from the flowers of Vitex pubescens. However, these flavones have been earlier isolated from one or the other Vitex species and the result shows close interrelationship among the species of this genus^{4,6}.
