

Ethno Veterinary Medicinal Drugs of Central Development Region of Nepal

N.P. Manandhar*

Received on 30th June, 1988

Information about 35 plants used as veterinary medicine in the rural areas of the central region of Nepal is presented here along with their vernacular names and medicinal uses. These plants are represented by 35 families of monocotyledons (5) and dicotyledons(30).

* Botanical Survey and Herbarium, Godawari
Lalitpur, Nepal.
