

Role of enzymes in Cumin *Jeerak* (*Cuminum*
cuminum Linn.) Wilt pathogenesis by
Fusarium oxysporum f. sp. *cumini*

R.S. Champawat¹ and P.D. Gemawat²

Received on 1st Oct., 1989

The wilt pathogen Fusarium oxysporum
f. sp. cumini (Patel et al, 1957) inducing
wilting in *Cuminum cyminum* secreted
pectinolytic and cellulolytic enzymes.
These enzymes were found to be responsi-
ble for plant pathogenesis.
