Received on 27th Feb., 1990

*Rajasthan is rich in traditional heritage, the local people including the tribals (mainly Meenas, Bhils, Girasias, Sahariyas) and others have faith in folk remedies by local practioners. In the present paper, out of forty folk remedies enumerated, 37 species are of plants origin and two claims are of animal products, and none of the claims enumerated find reference in classical Ayurvedic texts. Some of these claims such as on Jaundice, Fever, Birth control, Piles etc., besides others are claimed to be quite efficacious and may pave way in the discovery of safe, cheap and efficacious drugs.*
