

SOME SUPPLEMENTARY VEGETABLES USED BY THE TRIBALS OF SOUTH BIHAR

S.K. Singh¹ and M.N. Das²

(Received on 28-2-2000)

During the ethnobotanical exploration in the tribal and semi-tribal areas of south Bihar, a number of first hand information about some new and less known uses of plants were recorded. The present communication will give about 40 plant species belonging to 24 families used as supplementary vegetables by the natives of South Bihar.
