(Received on 15.9.1999)

*This paper deals with the studies on the occurrence and folklore cure of various skin diseases caused by heavy and continuous rain fall in the various localities of Arunachal Pradesh. As a result of discussion and observations of cure of skin diseases by local inhabitants of Arunachal Pradesh, eight number of herbs were recorded with their botanical identity and methods of use in detail. Studies on clinical trial of kwath prepared from the plants of chakramarda (cassia tora) on pama (scabies) and vicharchika (eczema) has also been described in the paper.*
