

# COMPARATIVE PHYTOCHEMICAL STUDIES OF NATURALLY GROWING AND TISSUE CULTURED PLANTS OF *VIOLA SERPENS* WALL.

U.R. Vishwakarma, A.M. Gurav and P.C. Sharma

(Received on 25.7.2005)

*Comparative phyto-chemical studies of naturally growing plants and tissue cultured plants of Viola serpens Wall. have shown that the tissue cultured plants raised from petiole callus were better than naturally growing plants in synthesizing primary and secondary metabolites.*
